Philippe Landry

Nicholas & Lee Begovich Center for Gravitational Wave Physics & Astronomy
California State University, Fullerton • 800 N State College Blvd, Fullerton, CA 92831

plandry@fullerton.edu • pgjlandry@gmail.com • landryp.github.io

CURRENT POSITION

POSTDOCTORAL RESEARCHER • California State University, Fullerton — Sep 2019 - Present

Postdoctoral research associate at the **Nicholas & Lee Begovich Center for Gravitational Wave Physics & Astronomy**; member of the National Science Foundation funded **Cosmic Explorer** project tasked with the horizon study for the US's third-generation ground-based gravitational wave detector

RESEARCH INTERESTS

Gravitational waves • Neutron stars • General relativity • Dense matter equation of state • Relativistic tides • Compact object populations • Post-Newtonian theory • Perturbation theory

EDUCATION

PHD, PHYSICS
University of Guelph • 2017
Advisor: Eric Poisson
Thesis: Tidal response of a rotating neutron star in general relativity

MSC, PHYSICS
University of Guelph • 2014
Advisor: Eric Poisson
Thesis: Tidal deformations of compact bodies in general relativity

BSC (HONS.), PHYSICS
Queen's University • 2012
Advisor: Kayll Lake
Thesis: McVittie solution with a negative cosmological constant

RESEARCH EXPERIENCE

POSTDOCTORAL SCHOLAR • University of Chicago — Sep 2017 - Aug 2019

Postdoctoral research scholar at the **Enrico Fermi Institute** and associate fellow at the **Kavli Institute for Cosmological Physics**; worked on various projects in gravitational wave astrophysics

GRADUATE RESEARCH ASSISTANT • University of Guelph — Sep 2012 - Aug 2017

Contributed to the development of the theory of relativistic tides in binary neutron star systems, including gravitomagnetic and spin effects

UNDERGRADUATE RESEARCHER • Queen's University — Sep 2011 - Apr 2012

Studied the global structure of an exact solution in general relativity for an undergraduate thesis

UNDERGRADUATE RESEARCHER • Royal Military College of Canada — May - Aug 2011

Worked on an observational space science project about derelict satellites for **Defence Research & Development Canada** as part of an NSERC undergraduate student research award

AWARDS & FELLOWSHIPS

NSERC POSTDOCTORAL FELLOWSHIP • NSERC — Sep 2017 - Aug 2019

Fellowship awarded by the Natural Sciences & Engineering Research Council of Canada for research potential and academic achievement; held at the University of Chicago

DTP/WITP THESIS PRIZE • Canadian Association of Physicists — Jun 2018

Award for best PhD thesis by a graduate of a Canadian university in the field of theoretical physics

ALEXANDER GRAHAM BELL CANADA GRADUATE SCHOLARSHIP • NSERC — May '16 - Aug '17

Scholarship awarded for research potential and academic achievement; held at the University of Guelph

DEAN'S SCHOLARSHIP • University of Guelph — Sep 2012 - Aug 2017

Scholarship for academic achievement

HARTLE AWARD • GR21 — Jul 2016

Award for best student talk in section of GR21 gravity conference at Columbia University

ONTARIO GRADUATE SCHOLARSHIP • Province of Ontario — May 2015 - Apr 2016

Scholarship for academic achievement held at the University of Guelph

BEST STUDENT TALK • 17th Eastern Gravity Meeting — Jun 2014

Award for best student talk at gravity conference at West Virginia University

UNDERGRADUATE STUDENT RESEARCH AWARD • NSERC — May - Aug 2011

Research fellowship held at the Royal Military College of Canada

TEACHING, SERVICE & OUTREACH

LECTURER • Lifelong Learning Lectures — Sep 2018 - Present

Participate in lifelong learning programs, giving public outreach talks on the topic of tides in Chicago and on the topic of gravitational waves in Fullerton

CO-EDITOR • Humans of LIGO Blog — Jul 2018 - Present

Conduct interviews and curate posts for public outreach blog profiling individual LIGO scientists

REFEREE • Physical Review, The Astrophysical Journal, Science — Sep 2017 - Present

Referee scientific articles for the journals Physical Review Letters, Physical Review D, The Astrophysical Journal Letters, The Astrophysical Journal and Science

SPACE VISUALIZATION LAB PRESENTER • Adler Planetarium — Jan 2018 - Aug 2019

Regular volunteer science presenter for Astronomy Conversations public outreach program

LECTURER • Undergraduate Physics Reading Seminar — Oct - Dec 2018

Helped design an interest-based non-credit course on computational methods in gravitational wave astrophysics for advanced undergraduates; delivered two lectures and devised a final assignment

COMMITTEE MEMBER • Guelph/Perimeter Institute Faculty Search — Jan 2016 - Apr 2017

Student representative on the joint University of Guelph/Perimeter Institute search committee for two faculty positions in theoretical physics

SEMINAR SERIES ORGANIZER • University of Guelph — Sep 2014 – Apr 2017

Co-founded, coordinated and secured funding for a series of outreach talks delivered by graduate students and aimed at physics undergraduates; also personally delivered a number of talks

COMMITTEE MEMBER • GWPI Coordinating Committee — Sep 2014 - Apr 2017

Student representative on the graduate program committee for the Guelph-Waterloo Physics Institute and participant in the 2016 institute director search

TEACHING ASSISTANT • University of Guelph — Sep 2012 - Apr 2017

Served as a teaching assistant for undergraduate courses in introductory physics, mechanics and electromagnetism, leading tutorials, supervising laboratories, grading assignments and exams, and occasionally delivering lectures

POSTER SESSION ORGANIZER • University of Guelph — May - Aug 2013

Organized a poster session for undergraduate summer researchers in the College of Physical and Engineering Sciences

MENTORING

GRADUATE STUDENTS

Bhaskar Biswas, **IUCAA** — Mar 2019 - Present

Bharat Kumar, **Institute of Physics, Bhubaneswar** — Sep 2017 - Dec 2018

UNDERGRADUATE STUDENTS

Abel Hernandez, **California State University, Fullerton** — Jan 2020 - Present

Marc Penuliar, **California State University, Fullerton** — Sep 2019 - Present

Isabella Molina, **California State University, Fullerton** — Sep 2019 - Apr 2020

Jérémie Gagnon-Bischoff, **Perimeter Institute** — May - Aug 2017

AFFILIATIONS

SCIENTIFIC COLLABORATIONS

LIGO Scientific Collaboration • Cosmic Explorer

PROFESSIONAL SOCIETIES

American Physical Society • International Society on General Relativity & Gravitation • Canadian Association of Physicists

SKILLS

LANGUAGES

English • French • Italian

PROGRAMMING

Python • C

COMPUTER ALGEBRA

Mathematica • Maple • Matlab

TALKS & PRESS

INVITED

[1] Panel: Neutron stars and dense matter. **JINA Horizons Workshop**, Joint Institute for Nuclear Astrophysics, online (2020).

[2] Dense matter science with Cosmic Explorer. **First Cosmic Explorer Conference**, Penn State, online (2020).

[3] Compact binaries as probes of dense matter and dark matter. **Snowmass 2021 Community Planning Meeting**, online (2020).

[4] Panel: QCD matter in equilibrium. **From Heavy Ion Collisions to Neutron Stars**, University of Illinois at Urbana-Champaign, online (2020).

[5] GW190814: An unexpected compact binary coalescence from the mass gap. **DESY Astroparticle Seminar**, DESY Zeuthen, online (2020).

[6] GW190814: Gravitational waves from the coalescence of a 23 $M_\odot$ black hole with a 2.6 $M_\odot$ compact object. **LIGO-Virgo-Kagra Webinar**, online (2020).

[7] Insights on neutron-star matter from gravitational waves, hotspots and massive pulsars. **CaJAGWR Seminar**, Caltech (2020).

[8] Neutron star tides and quasi-universal relations. **Merging Visions**, Kavli Institute for Theoretical Physics (2019).

[9] New developments in gravitational-wave inference of the neutron star equation of state. **IUCAA Seminar**, Inter-University Center for Astronomy & Astrophysics (2019).

[10] Inferring the neutron star equation of state from gravitational waves: a new, non-parametric approach. **Center for Gravitation, Cosmology & Astrophysics Seminar**, University of Wisconsin - Milwaukee (2018).

[11] Tides in spinning neutron star binaries. **Theory Canada 13**, St Francis Xavier University (2018).

[12] Dynamical tidal response of a rotating neutron star. **Canadian Institute for Theoretical Astrophysics Seminar**, University of Toronto (2016).

[13] Photometry of derelict GEO and GPS satellites for rotation rate characterization. **Physics Department Colloquium**, Royal Military College (2011).

CONTRIBUTED

[14] Constraints on the neutron-star equation of state with gravitational-wave and pulsar observations. **APS April Meeting**, online (2020).

[15] A nonparametric approach to gravitational-wave inference of the neutron star equation of state. **GR22 + Amaldi13**, University of Valencia (2019).

[16] Inferring neutron star properties from GW170817 with universal relations. **28th Midwest Relativity Meeting**, University of Wisconsin - Milwaukee (2018); **APS April Meeting**, Denver CO (2019).

[17] Rotational-tidal phasing of the binary neutron star waveform. **18th Atlantic General Relativity Meeting**, St Francis Xavier University (2018).

[18] Extended I-Love relations for slowly rotating neutron stars. **27th Midwest Relativity Meeting**, University of Michigan (2017); **APS April Meeting**, Columbus OH (2018).

[19] Dynamical tidal response of a rotating neutron star. **GR21**, Columbia University; **26th Midwest Relativity Meeting**, Perimeter Institute (2016); **APS April Meeting**, Washington DC (2017).

[20] Tidal deformation of a slowly rotating compact body. **International Conference on Black Holes**, University of Toronto; **General Relativity & Gravitation: A Centennial Perspective**, Penn State; **25th Midwest Relativity Meeting**, Northwestern University (2015).

[21] Tidal deformation of an irrotational fluid body. **18th Eastern Gravity Meeting**, Rochester Insitute of Technology; **Fields Institute Focus Program on General Relativity**, University of Toronto (2015).

[22] Relativistic theory of surficial Love numbers. **17th Eastern Gravity Meeting**, West Virginia University; **24th Midwest Relativity Meeting**, Oakland University (2014).

[23] Tides in higher-dimensional Newtonian gravity. **16th Eastern Gravity Meeting**, University of Toronto; **23rd Midwest Relativity Meeting**, University of Wisconsin - Milwaukee (2013).

PUBLIC

[24] Listening for black holes and neutron stars: LIGO's recent gravitational wave discoveries. **Osher Lifelong Learning Institute Lecture**, Cal State Fullerton (2020).

[25] Tides in the solar system and the universe. **Art of Science Lecture Series**, Agitator Art Gallery, Chicago (2019).

[26] Tides: from the seas to the stars. **Lifelong Learning Lecture Series**, Chicago Cultural Center (2018); Sulzer Regional Library, Chicago (2019).

[27] Neutron stars: dense, strange and not too bright. **Astronomy on Tap**, Marz Community Brewing, Chicago (2018).

[28] Gravitational waves and transient astronomy: a discussion of GW170817. **Public Lecture**, University of Chicago (2017).
